

What's New in SSIS Version 16.1? DRAFT

January 2016

Highlights:

Child Foster Care Report/Flipping Claims

- “Warrant / Eff Date” is the default Date Type for the Child Foster Care Claims Search. The date range for this defaults to “Custom.”

Commissioner Transition

- Action menu option available for Commissioner Transition Verifications allows agency staff to add a second relative after the original verification has already been completed.
- Child’s name displays in the Commissioner Transition Log tree view instead of a folder.
- Commissioner Transition Worksheets updates so user can add the MFIP payment and adjust amounts for the RCA Percentage and MFIP only grants.

Healthcare Claiming

Additions and changes to many Remittance Advice Adjustment Reason Codes.

A new proofing message #2308 displays when a client’s Eligibility Major Program is not valid for the Waiver Type. This proofing message is associated with ECS Services only.

Changed MH Indicator on ICD-10 codes F94.9, G47.29, and Z63.4 from “N” to “Y.”

MAPCY

The method used to determine the next due date for a MAPCY is updated to accommodate a policy decision that once a child has an NAA or NKA Eligibility Determination that has the status of “Determination confirmed”, then a new MAPCY is not required until the first day of the 25th calendar month following the status changed date.

Placement

The IV-E Placement by Date Range with DOC Assessments report is replaced with a new report titled MAPCY/DOC Assessments for Non-Group Facility Placements. The new report has two sub-grids containing either DOC or MAPCY information depending on whether the placement is Legacy or Northstar. The new report excludes group facility settings and locations.

The dropdown list for the Permanency “Plan A” field is revised as follows: Reunify with parents or principal caretakers, Transfer of permanent legal and physical custody to a relative, Adoption with relative, Not yet determined, and Transition to adulthood (ages 18-21). The last option is conditionally available, based on age of youth. The dropdown list for the “Plan B” field is revised as follows: Transfer of legal and physical custody to a relative, Adoption with relative, Adoption with non-relative, Not yet determined, and Transition to adulthood (ages 18-21). The last option is conditionally available, based on age of youth.

Programs and Services

Various HCPCS/Modifiers changes including Moving Home Minnesota updates

Security

“Access SEY” is a new security function available for the new Sexually Exploited Youth screen. The functionality includes create/view/edit/delete.

Service Arrangements

Able to Inactivate or Unencumber Service Arrangements if a new MAPCY exists with an effective date that overlaps the service dates.

Sexually Exploited Youth

A new Sexually Exploited Youth screen is available from under the Person tree. The purpose of the screen is to record whether a youth is a sex trafficking victim. The reason for the new screen is that Title IV-E agencies must report annually to HHS the total number of children and youth who are identified as sex trafficking victims. The law requires trafficking data to be added in AFCARS.

In addition to the screen, new options are available under Child Maltreatment Allegations to indicate sex trafficking cases. Clients through age 23 can now be selected as an “Alleged Victim” when the “Allegation Details” is “Sex Trafficked” and the “Estimated date of most recent occurrence” is prior to the alleged victim’s 24th birthday.

When clients are merged this data will be saved to the person saved. If clients with this screen are copied to another agency this data will not be copied.

Vulnerable Adult

Adult Maltreatment Reports will have two tabs added: Safety and Shared Comments. The “Safety” tab is being added in further efforts to ensure local agencies have the same information that is available in the MAARC Call Center reports. Information entered by the MAARC Call Center staff will display for local agencies to review. The “Shared Comments” tab is a new feature that allows discussion between lead investigative agencies and MAARC Call Center staff. Users on both ends will be able to create a “New Comment” that can be reviewed by all agencies connected to that report. **Note for pilot agencies:** The “Shared Comments” tab will display right away, but discussion items with the MAARC Call Center staff will not function until the second pilot update.

A new option will display on the “Referral” tab that allows local agencies to manually update the Lead Investigative Agency (LIA) grid statuses. This information will show the bounce history of a report.

The MAARC Call Center has an updated way of entering Participant relationships. The “Roles” tab on the Adult Maltreatment Report will include “Role Description” information to further identify a Participant’s relationship to the Alleged Victim or Alleged Perpetrator. **Note to pilot counties:** This feature will not display until the second pilot update.
