## State Innovation Model (SIM)

September 30, 2014

---

### Statewide Learning Days for Health Care Homes (HCH) and the State Innovation Model (SIM) grant

Planning is underway for the Statewide Learning Days in May 2015, including a half-day workshop format on May 12 and 14, and full-day conference events on May 13. The event will be held at River's Edge Convention Center in Saint Cloud, MN. More information will be available at the [Health Care Homes Learning Collaborative website](#).

---

### Learning Collaborative Advisory Committee meeting update

The third meeting of the Health Care Home/Minnesota Accountable Health Model Learning Collaborative Advisory Committee was held on September 11, 2014. The committee is charged with advising on content, format and delivery for the Statewide Learning Collaborative for health care home and State Innovation Model grant activities. The agenda for the September meeting focused on advising the state on upcoming practice facilitation, practice transformation and the learning community RFPs. More information can be found at the [Health Care Homes Learning Collaborative website](#).

---

### Practice Facilitation and Learning Collaborative work groups update

The internal and external discussion groups - formed to advise the work of practice transformation and learning collaborative for the SIM project - each met twice in September and provided experiences and information related to practice facilitation, practice transformation, and learning communities.

### [Community care teams create health and hope in Ely](#)

As part of regional meetings, the Minnesota Accountable Health Model – SIM Minnesota shared a video to highlight an example of what Accountable Communities for Health can accomplish through partnership and integration. [Watch now](#) to see how Ely providers got results by coming together and forming a Community Care Team.

### [County profiles on data access portal](#)

The Minnesota Department of Health now provides health and environment data profiles by county. The Minnesota Public Health Data Access portal features an interactive map allowing the user to select a geographical area and review a variety of health and environmental data, the same high-quality data found throughout the Data Access portal. You can use the County Profiles to generate an overview of public health in your county, and to see how your county compares to the state.
